The Rules

The Rules

The Fiesta 13's **The Big List Trivia Game** is a game for up to 4 player using the Numbers & Moons system. The game is played using a 40 movie game board. You can play competitively, co-operatively or solo. The four player colors are red, green, blue & yellow.

The Christmas (Horror) in July variation covers Christmas-themed horror movies of the 20th Century in Chronological order.

Set-Up
Each player gets 14 numbered token reels.

There are 13 questions. Each questions consist of 3 clues to the movie answer.
You may place a Reel Token after each clue.
You may put up to two reel tokens on each question, one on the Number's square & one on a moon.

However, you only have 13 Reel Tokens for the whole game. In total, there's 39 clues for 13 questions, each clue an opportunity to play a token. But only 13 tokens.

The first clue to each question is always the IMDB Description of the movie.
The second clue is called Three Things. Three words or phrases pertaining to the movie. This can include any mix of actors, directors, character names, movie settings, significant items from the movie, and song names.
The third clue can be one of the following categories: Movie Poster taglines, Quotes, There's a Scene…, & Riffs (only for riffed movies)

Players rotate who goes first after each question & rotate placement of reels, so the first player is rotated. The first player reads the clues. Rotate who reads. The reels are placed in numerical order by each player from 1-13.

Player Options

PASS: You never HAVE to place a reel token.
Place Reel Token on 4-Number or 2-Numbered Square. This can only be done after the first clue, the IMDB description
Place Reel Token on a Moon. This can be done on the player's turn after any of the three clues per question.

Each numbered square connects to either 4- or 2 movies. By placing the reel token, you are eligible for a correct answer for each movie the Reel Token covers.

You can only put a Reel Token on a moon for clues 2 & 3 of each question.
Placing a token on a moon space requires a specific placement. The player mentions a movie number & the token is placed going clockwise from the number. If in doubt, there's a A, B, or C in the quarter moon on the side of the movie poster. Place Reel Token on first empty space.

If full, start again on the A segment. When placing, you can say, for instance 15C, to indicate the space. Saying just 15 would put the token on the number 15. (Only after the first clue.)

You may not place a token on the same space as a player played on THIS turn. As the game progresses, numbers or moons may have more than one token. Organize the Reel tokens on a number or moon stack with the highest numbered token on top.

The tokens stay on the game board until the end of the game.

After the thirteen questions, if you have any tokens left over, you may place, taking turns, up to three tokens on ANY EMPTY MOON SPACE.

Before scoring, you may place the number 14 token in the middle of any movie poster you want to watch this evening. The winner picks the movie.

SCORING

Starting with the last question, answer number thirteen going back ward to number one in order. The Answer sheet will go from #13-#1.
For each answer, take the highest number Token Reel off the number square & the highest number Token Reel off one of the three correct moons. If any. Leave all other tokens. If two or more tokens have the same highest token number, score all of them.

Give the token back to the correct player.

Scoring: Each correct answer is worth:

2 points for a 4-numbered square.
3 points for a 2-numbered square

1 point for each full moon
2 points for each half moon.
3 points for each quarter moon.

After all 13 answers, all leftover tokens are unscored.

So, how to physically play?

Our plan is to eventually code a game on board game creator. But you can play the game in any image editor with layers to place the tokens.
